

MONROE CCT PENDANT

SKU# 22161

Rated Voltage 220-240V~ 50Hz

Thank you for purchasing this quality LEDlux product. To ensure correct function and safety, please read and follow all instructions carefully before assembly, installation and use of this product. Please keep instructions for future reference.

Warranty

- This luminaire is covered by a 3-year warranty. The warranty is from date of purchase, not the date of installation.
- If the luminaire is not assembled and installed by a licensed electrician, the warranty will be void.
- Please retain the proof of purchase and evidence of installation by a licensed electrician for any warranty enquiries.
- The use of non-compatible dimmers may damage your LED luminaire and will void your warranty.
- Warranty will be void if there is any damage due to improper usage or modification to the luminaire.
- Failure to comply with the instructions in this manual may increase the risk of damage or injury and will void the warranty.

Installation Requirements

- This luminaire must be assembled and installed by a licensed electrician.
- All wiring and installation of the luminaire must adhere to the latest local and national wiring rules.
E.g. AS/NZS 3000 Electrical Installations Do not exceed the maximum wattage rating.
- The luminaire is a Class I product and must be earthed during wiring and installation.
- Select a suitable location for installation:
 - This luminaire is suitable for indoor use only.
 - The mounting point must support 2 times the weight of the luminaire.
 - Ensure the luminaire is not installed in direct line of an air vent/system.
 - If installing a luminaire in an area prone to moisture, ensure that the area is well ventilated, and an appropriately rated exhaust fan is used if required. Damage or corrosion caused by moisture is not a product fault, and as such is not covered under warranty.
- This luminaire is dimmable and was tested with the dimmers listed in the specification section at the date of publication.
- **NOTE:** Dimming may cause buzzing sounds or a slight flicker. There may be slight delays with the LED luminaire start-up or uneven light performance when more than one LED luminaire is linked together, switched ON or dimmed. This is not a product fault and as such is not covered under warranty.
NOTE: Some dimmers have a minimum load of 20W. Ensure the dimmer position is on the maximum setting before turning on the LED light and adjust the dimmer down to your desired light level.
NOTE: Testing cannot account for installation variables such as variation in mains supply voltage, cable capacitance, electrical noise, transients, surges and ripple control signals.
- Take care not to pull any electrical wires during unpacking as this may damage the connection.
- Lay out all the components on a smooth surface and make sure no components are missing before assembling. If parts are missing, return the complete product to the place of purchase for inspection or replacement.
- Check whether the luminaire has been damaged during transport. Do not operate/install any product which appears damaged in any way. Return the complete product to the place of purchase for inspection, repair or replacement.
- Ensure power to the circuit you are working on has been switched OFF before commencing any electrical work.

Installation Directions

NOTE: Due to the size and weight of this luminaire, two people will be required to lift the luminaire up during the installation process.

1. Remove all packaging material from the product and be careful not to throw away accessories that may be hidden within the packaging material. If assembly is required, place the luminaire on a smooth non-scratch surface.
2. Determine the length of the suspension rod required for your installation location.
Install the required lengths of suspension rod (J, K, L, M, N) onto the body (O) of the luminaire.
Pull the cord out as you install the suspension rods (J, K, L, M, N) to remove any slack.
Take care, not to cross-thread or twist and damage the cord.
3. Install the canopy (H) onto the top suspension rod by attaching the knuckle joints (I), followed by securing the nuts (H) inside the canopy (H) with the spanner provided.
4. Connect the red (+) and black (-) luminaire wires to the red (+) and black (-) wires on the output end of the LED driver via the square connectors (P).

NOTE: The luminaire wires are SELV, do not connect directly to 240V.

5. Use the mounting bracket (B) as a template to mark the screw positions on the ceiling.
6. Install the mounting bracket (B) onto the ceiling by using appropriately sized mounting screws (C) and anchors (A).
Ensure the screws (C) and anchors (A) used are suitable for the mounting surface and the surrounding environment.
7. Open the cover of the terminal box (D) and connect the mains supply wire.

Mains Supply Wire

Neutral – Blue or Black

Live – Brown or Red

Luminaire Wire / Terminal Block

Blue or N

Brown or L

8. Ensure the wires are secure and no bare wires are exposed. Install the cover back over the terminal box and use the cord anchorage to secure the mains supply wire.
9. Connect the mains earth wire to the floating earth terminal block (E).

Mains Supply Wire

Earth – Yellow/Green 

Luminaire Wire / Terminal Block

Yellow/Green 

NOTE: The luminaire is a Class I product and must be earthed during wiring and installation.

10. Install the canopy (H) onto the mounting bracket (B) and secure by tightening the screws (G) on the sides.
11. After the installation, switch on the luminaire to test and enjoy your new lighting product.
12. To operate the colour shifting function, use the wall switch.
While the luminaire is on, toggle the wall switch OFF and ON again within 3 seconds.
The colour shifting sequence will jump from 3000K – 5000K – 4000K. - For the colour shifting to memorise the colour temperature, leave the wall switch OFF for over 7 seconds. - To reset the colour shifting, toggle the wall switch OFF and ON twice within 1 second.

Safety Tips

- Always ensure the power is OFF and the luminaire has cooled down before performing any maintenance, cleaning or making any adjustment to the luminaire.
- To avoid injury or damage to the luminaire, ensure that power leads and screws are secure before connecting the power.
- Select a suitable location away from liquids and hazards.
- To clean, wipe with a soft damp cloth. Do NOT soak or immerse the luminaire in water or other liquids.
- Ensure that the luminaire does not come in contact with corrosive chemicals/solvents or abrasive cleaners etc.
- The light source of this luminaire is not replaceable; when the light source reaches its end of life, the whole luminaire shall be replaced. There are no serviceable parts, do not attempt to dismantle or open the product.

Troubleshooting		
PROBLEM	POSSIBLE CAUSE	SUGGESTED SOLUTION
Does not work. (New installation)	Loose wiring or no power to the luminaire.	Check your circuit breaker/safety switch box and turn on the power to your circuit.
		Contact the installing licensed electrician to check if the luminaire has been installed correctly.
Does not work. (Existing installation)	No power to the luminaire.	Check your circuit breaker/safety switch box and turn on the power to your circuit.
		Contact your nearest Lighting Direct store.
Flickers when dimming. (New installation)	Non-recommended dimmer used.	Check the dimmer used. Ensure the dimmer used is on the list of recommended dimmers in this manual.
	Some dimmers have a variable loading adjustment function. This may not have been adjusted during the installation of the dimmer.	The variable resistor needs to be adjusted to suit the luminaire load to reduce the flickering.
Flickers when dimming. (Existing installation)	Dimmer position on low.	Ensure the dimmer position is on the maximum setting before turning on the luminaire and adjust the dimmer down to your desired light level.
Buzzing sound.	Non-recommended dimmer used.	Check the dimmer used. Ensure the dimmer used is on the list of recommended dimmers in this manual.
Uneven light on start-up	Dimmer position on low when switched on.	Ensure the dimmer position is on the maximum setting before turning on the luminaire and adjust the dimmer down to your desired light level.
